

## Year 6 - Summer Term

### Maths

Throughout all our maths lessons we work through a variety of differing fluency, reasoning and problem-solving tasks. During the summer term we focus on ratio and proportion, measurement, geometry and statistics.

### Reading

We read a wide range of texts in our whole class reading lessons, many of them linked to our curriculum. Wonder and Boy are the main texts of focus this term. Children will develop their comprehension skills through these rich and engaging texts. As part of reading enrichment, your child's class teacher will read You Are Awesome and Cloud Busting.

## Writing

During this term we will use the texts *The Island*, *Wonder* and *The Boy, the Mole, the Fox and the Horse*. We start with diary entries from a range of perspectives, before looking at writing throughout the year and giving children an opportunity to edit and upskill their favourite pieces to create a personal portfolio for secondary school. We conclude the term with children creating their own inspiring picture book based on the uplifting and motivational book from Charlie Mackesy.

## Science

Our science during the spring term focuses on evolution and living things and their habitats. Children will be taught to recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago. We conclude the term by creating identification charts of plant and animal habitats.

## P.E.

We begin the term with tag rugby and cricket. Children will then move onto athletics in preparation for sports day.

## Geography

Children will explore the local area using an Ordnance Survey. We will also use satellite imagery to look at a number of different geographical locations and environments.

## Art

In art we explore surrealism and pop art. Children will have the opportunity to create a representational piece of surrealist art and use a photo of themselves to create their own pop art portrait.

## Computing

Children will have the opportunity to use iPads and iMovie to script, record and edit their own silent movie.

## R.E

In RE we discuss how the five pillars of Islam help Muslims live a good life. We conclude the term with a reflection on we can live together in one world.

## Learning for Life

In Learning for Life we will be focusing on relationships. This is a very varied topic but essential to how we interact with those around us! We will be learning about what how to deal with the demands of different aspects of relationships with those around us and most importantly with ourselves. We will continue to look at mental health and the best way to develop health relationships. We will also be developing strategies to deal with loss and good ways to keep us safe online!

MFL

In French, the children will be learning about how to speak about themselves and those around them.

### How can I support my child?

Regular reading and discussion with your child about their chosen reading book is still very valuable. Encourage them to record their reading and to complete the weekly task in their reading diary. Supporting your child with the learning of their weekly spelling and mastery of the multiplication tables is also a valuable skill.

In addition to the above, children will also receive weekly Maths and English homework tasks that will be uploaded onto Google Classroom.
